Abstract of the Disclosure

~~The invention relates to a~~ A connector ~~comprising that includes a first connector~~
with a first insulating body, and first contact elements supported by ~~said the~~ the first
insulating body~~[[,]] said. The first insulating body comprising: has at least one guiding or~~
catching area having a perimeter defining and limiting ~~said the~~ the catching area~~[[,]] said.~~
The catching area ~~being is~~ is adapted to assure that even for a certain amount of
misalignment between ~~said the~~ the first connector and a second connector supporting second
contact elements and adapted to be coupled to ~~said the~~ the first connector a proper
engagement and connection of ~~said the~~ the first and second~~[[,]]~~ contact elements occurs~~[[,]]~~
~~thus forming a.~~ A connector system is formed due to the fact that ~~said a~~ a guide means
provided on ~~said the~~ the second connector ~~cooperate~~ cooperating with ~~said the~~ the catching area,
and ~~guide said~~ guiding the first and second connectors into engagement ~~wherein the.~~ The
outer perimeter of ~~said the~~ the catching area has can have the shape of one of a square and a
rectangle.
